

DENİZ IZCI

FULL-STACK DEVELOPER | REACT NATIVE, REACT, TYPESCRIPT & NODE.JS

Lisbon, Portugal | denizeizci@outlook.com | github.com/kaiscout | denizci.dev

Full-stack developer with software development experience since 2022, building mobile and web products with React Native, React, TypeScript, and Node.js. Translates operational problems into working software, from KPI dashboards and workflow automation to source-grounded AI products.

Experience

Software Engineer / Developer, Port City Football Club - Wilmington, NC 2022

- Built internal KPI dashboards that unified business and operational reporting into clear views of performance, priorities, and trends.
- Developed workflow automations that replaced repetitive reporting and operational steps with faster, more consistent, repeatable processes.
- Built internal software from club business requirements, creating a structured foundation for data-informed planning and execution.

Projects

CasePilot AI, Full-Stack Developer Oct 2025 - Present

React Native | Expo | TypeScript | Node.js | OpenAI API | Render | RevenueCat

- Built a multilingual React Native app that reduces language barriers in official immigration research across 30 languages.
- Engineered a source-grounded search pipeline that indexed 1,951 official USCIS pages into 14,964 searchable passages.
- Implemented 108 automated tests across 12 files, strengthening release workflows across EAS, TestFlight, RevenueCat, and Render.

Load Request Portal, App Developer 2026

TypeScript | React Native | Expo | Webhooks

- Developed a five-stage freight request portal with validation, attachments, and progress tracking, organizing requests into one structured workflow.
- Built role-based inboxes, private notes, archive and restore controls, and CSV export to centralize request management.
- Engineered retry-safe notifications with webhooks, email delivery, and backend synchronization, keeping request states aligned across the full lifecycle.

Storefront QA Sprint, Full-Stack Developer 2026

React | TypeScript | Cloudflare | Drizzle ORM | Tailwind CSS | Stripe

- Built a full-stack service platform that turns storefront QA findings into reviewed, scheduled, and paid engagements.
- Integrated Firecrawl, Gmail, Cal.com, and Stripe to connect discovery, outreach, booking, and payment without manual re-entry.
- Engineered a review-controlled automation pipeline with deduplication, scoring, webhooks, delivery, and a 30-day regression watch.

Skills

Programming: TypeScript, JavaScript

Mobile & Web: React Native, React, Expo, Tailwind CSS, Node.js

AI, Data & Automation: OpenAI API, KPI dashboards, operational reporting, workflow automation

Platforms & Integrations: Cloudflare, Render, Drizzle ORM, Zod, Stripe, Firecrawl, webhooks, Git/GitHub

Education

University of North Carolina Wilmington (UNCW) - Wilmington, NC 2020 - 2024

Economics | Cameron School of Business | English and Turkish (native or bilingual)

Currently building: CasePilot AI, a 30-language mobile product designed to make official immigration guidance easier to find and understand.
